**Laurel Lacher** • Absolutely AQTESOLV. I would never try anything else because I can't imagine any problem that Glenn Duffield couldn't help me solve!

Bernard Brixel

**Bernard Brixel** • Started using AQTESOLV since joining Robertson GeoConsultants Inc. Everyone pretty much summed it up: it's a great software, accompanied by a good user manual and with outstanding technical support!

**Bob St. Louis** • Totally agree with the other commenters. Glenn has built a wonderful product that is both powerful and user-friendly. Oh, and speaking of friendly, if a person has a question about the software, Glenn is very quick to provide help, either by phone or email. Great product, great customer service. What more could you want?
